Re: Going Home

As you all may have heard, we have a new product under preparation for release later this year entitled Going Home. It is the collaborative effort of Dr. Elizabeth Kubler-Ross ( Author of On Death and Dying ) Dr. Charles Tart ( Author of Altered States of Consciousness), and Bob Monroe.

The primary purpose of Going Home is to help people in the process of dying to release the fears associated with death, as well as the attachments which keep them bound to their physical lives. This is accomplished by methods taught in our LIFELINE program which utilizes Hemi-Sync to help induce the transcendent states so often reported by people who have had "near death experiences". It is through these induced states that the person dying can experience, and thus have a knowledge and understanding, that they do survive physical death. The series also includes an exercise to help resolved "unfinished business" which could potentially keep the person dying from doing so with a sense of peace and dignity.

The series in its current format consists of seven progressive learning exercises which are meant to be repeated until the subject (the person dying) is comfortable with them. It also includes an in depth interview with the co-creators, and a Catnapper type tape for those people attending the dying person. There may also be a tape which is tentatively called the Relocation Theme. This tape will be used after the person has "passed on", and will consist of music and instruction to "move towards the light/focus 27/wherever the subject's religious beliefs will take them". This concept is in keeping with the reports given to us from people who have had NDE's: " That some people stay around after their bodies have died for up to 2 hours".

Going Home is approached purely from a scientific standpoint. It incorporates years of research by the co-creators, which has resulted in literally hundreds (if not thousands) of documented cases and observations of people engaged in the dying process. All of these have resulted in the knowledge that people do indeed survive physical death. Where they go and what they do is completely up to the person dying, and his/her beliefs during their lives.

As you can well imagine, this series brings up a lot of questions, and could evoke controversy, so it is important that everyone here know what Going Home is and what it is not. Again, the primary purpose is :

TO SERVE AS AN AID IN HELPING PEOPLE RELEASE THE FEARS AND ATTACHMENTS SURROUNDING PHYSICAL DEATH.

TO GIVE A GUIDED TOUR (so to speak) OF THE AREAS ONE MAY EXPERIENCE AFTER THEIR PASSING.

TO ENCOURAGE THE SUBJECT TO MOVE QUICKLY TO THEIR INTENDED DESTINATIONS AFTER THEIR PASSING.

TO ALLOW THE DYING PROCESS TO BE AN EXPERIENCE FILLED WITH PEACE AND DIGNITY.

Going Home does not:

DIRECTLY ADVOCATE OR CONDEMN THE "RIGHT TO DIE ISSUE".

DIRECTLY CONDEMN OR ADVOCATE ANY RELIGIOUS BELIEF.

ARTIFICIALLY QUICKEN OR PROLONG THE DYING PROCESS.

Although the Going Home series was designed for use by terminally ill persons in the process of dying, you can rest assured that a great deal of our customers who are nowhere near dying will want this product because it utilizes focus levels all the way to focus 27. This is the first time we are releasing frequencies above focus 12. We encourage their use if they wish to wish to prematurely "release the fears and attachment of physical death by direct experience". Also for matters of simplicity, we are deleting the word "FOCUS" from the tapes and indicating the "level" by its number only: ie. 10,12,15,21,22,23,25,27.

I personally feel that this is the most important tape series we have ever released. If you are not afraid to die, the chances are you won't be afraid to LIVE!!!

If you have any questions, or feel that you don't wish to address the questions of the public at this time, call me.
